Bridget Wallace	Sunday, April 29	The website is really easy to use and very visually pleasing. On the about page theres a lot of blank space when you scroll down. I love the use of social media posts on the "why" page, although it might be useful to have a little explanation at the top of the page explaining the purpose of the posts. I love the format of the "projects" page, and the FAQs are very easy to sift through. Also, SO COOL that the entire website is bilingual. A+++
Eliza Letourneau	Sunday, April 29	I like the top part, but the logo thing when you scroll down is a lil too zoomed in like i can't see the whole thing. Could put some images in the media tab to break up the repetitive visuals. There's a weird amount of white space when you scroll down on the about tab. The projects tab looks really good! I like that you can click on each at the top to take you to it, and the same with the FAQ.
Hyun Keun Ahn	Sunday, April 29	Layout of the website is simple to follow and makes effective use of logos and images to capture the attention of the audiences. I especially liked the FAQ page. Although there are a lot of texts, I understand that information is necessary given the nature of the site. It was really generous for them to provide the contents in two different languages for the users to follow. Holistically, the website was very well made.
Cameron King	Sunday April 29	I really like the material design across the site. Bugs to fix are the sidebar, making it take up the side of the screen. Also fix the Why? Page so that you dont have to click for the info to show up. A lot of tabs but that makes sense. Overall smooth user experience. Really like the spanish to engish button`
